Application No.: 09/368,792 Docket No.: 10981001-1

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) Apparatus for converting analog video data into digital form, the apparatus comprising:

an analog video cassette player for producing analog video output;
an analog to digital converter for converting said analog video output into digital data;
at least one recorder employing a digital storage medium for storing said digital data,
wherein said cassette player, said at least one converter and said storage medium are disposed
within a single container wherein said digital storage medium is insertable into and
removable from said container; and

a key frame marker for inserting at least one marker into the digital data.

- 2. (Original) The apparatus of claim 1, further comprising: a video port for receiving analog video information from an external source.
- 3. (Original) The apparatus of claim 1, wherein the video cassette player employs a VHS format.
- 4. (Original) The apparatus of claim 1, wherein the digital storage medium is one of a CD R or a CD RW.
- 5. (Original) The apparatus of claim 1, wherein the digital storage medium is a recordable DVD.
- 6. (Original) The apparatus of claim 1, wherein the digital storage medium is selectable by the user.
- 7. (Previously Presented) The apparatus of claim 1, further comprising: wherein the a key frame marker for marking marks abrupt changes in video image sequences, thereby enabling a user to readily locate a beginning and an end of a particular video sequence.
- 8. (Previously Presented) The apparatus of claim 1, further comprising: wherein the a key frame marker for marking marks positions in a sequence of said digital data at selectable time intervals.

2

Application No.: 09/368,792 Docket No.: 10981001-1

9. (Original) The apparatus of claim 1, wherein the video cassette player employs the 8 mm format.

10. (Currently Amended) A method for preserving analog video data in digital form, the method comprising the steps of:

providing a container;

storing.

producing analog video output from an analog video tape <u>in said container</u>;
converting said analog video output into digital video data <u>in said container</u>;
<u>inserting a removable digital storage medium into said container</u>; and
storing said digital video data in [[a]] <u>said non volatile</u> digital storage medium thereby
protecting said data against degradation over time <u>in said container</u>; and
providing a single container to perform the steps of producing, converting, and

- 11. (Currently Amended) The method of claim 10 comprising the further step of: determining a required digital storage format prior to said step of converting based upon detection of a format of [[an]] said inserted storage medium.
- 12. (Original) The method of claim 10 comprising the further step of: inserting at least one marker in said digital video data to identify abrupt changes in video scenery, thereby enabling a user to readily identify particular video sequences during playing of said digital video data.
- 13. (Original) The method of claim 10, comprising the further step of: inserting at least one marker in said digital video data at selectable time intervals, thereby enabling a user to readily move to selected chronological points in a video sequence during playing of said digital video data.
- 14. (Original) The method of claim 10, wherein the digital storage medium is one of CD R or CD RW.
- 15. (Original) The method of claim 10, wherein the digital storage medium is a recordable DVD.

25449718.1

Application No.: 09/368,792 Docket No.: 10981001-1

16. (Original) The method of claim 10, wherein the digital storage medium is digital tape.

- 17. (Original) The method of claim 10, wherein the analog video tape is in VHS format.
- 18. (Original) The method of claim 10, wherein the analog video tape is in 8 mm format.
- 19. (Currently Amended) Apparatus for preserving analog video data in digital form, the apparatus comprising:

a video cassette player for producing analog video output <u>from an inserted video</u> <u>cassette</u>;

an analog to digital converter for converting said analog video output into digital data thereby protecting said data against degradation of over time; and

one of a CD recorder and a DVD recorder for storing said digital data <u>onto at least</u> one inserted digital storage medium, thereby transferring said analog video from said inserted <u>cassette to said inserted digital medium</u>, wherein said video cassette player, said analog to digital converter, and said digital storage medium are disposed within a single container.

- 20. (Original) The apparatus of claim 19, further comprising:
- a key frame marker for inserting index markers in said digital data marking abrupt changes in video image sequences, and alternatively, at selectable time intervals.
- 21. (New) The method of claim 10, further comprising:
 removing the digital storage medium from said container after storing said digital video data in said digital storage medium.
- 22. (New) The apparatus of claim 19 wherein the digital storage medium is insertable into and removable from said single container.
